**PODIUM KART** is at the forefront of the go-karting industry, delivering high-performance **ELECTRIC GO-KARTS** that offer an exhilarating and safe racing experience. Designed with cutting-edge technology and top-quality materials, our karts are perfect for both recreational and competitive racing.

Below are the detailed specifications for two of our premier electric kart models: the Podium Electric Adult Kart and the Podium Electric Twin-E Kart.

**PODIUM ELECTRIC FOX ADULT KART**

**Chassis:** Chrome Moly

**Length:** 1865 mm

**Width:** 1350 mm

**Weight:** 397 Lbs

**OPTIONAL**

Safety Remote System  
Dehaardt or RaceFacer Race Safety

**Braking:** Hydraulic

**Voltage:** 60 v

**Power:** 6.5 HP or 9 HP

**Battery:** 1 Hr Run Time

**Max MPH:** 45

**PODIUM TIGER E-KART TWIN KART**

**Chassis:** Chrome Moly

**Length:** 2000 mm

**Width:** 1380 mm

**Weight:** 410 Lbs

**OPTIONAL**

Safety Remote System  
Dehaardt or RaceFacer Race Safety

**Braking:** Hydraulic

**Voltage:** 60 v

**Power:** 6.5 HP or 9 HP

**Battery:** 1 Hr Run Time

**Max MPH:** 45

## **ELECTRIC FOX KART**

The Podium Electric Adult Kart is engineered for single riders who demand speed, agility, and safety. The Chrome Moly chassis ensures a strong and lightweight frame, optimizing both performance and maneuverability. With a peak power of 6.5 KW and a 60V motor, this kart delivers rapid acceleration and a thrilling top speed of 45 MPH.

The kart is equipped with a long-lasting battery that provides up to 60 minutes of continuous run time, making it ideal for extended racing sessions. The hydraulic braking system offers precise and reliable stopping power, enhancing safety on the track. Additionally, the Dehaardt or RaceFacer Race Safety remote system provides real-time monitoring and control, ensuring that drivers can race confidently and securely, which can be bought separately.

## **PODIUM TWIN E-CART**

The Podium Electric Twin-E Kart is designed for two riders, offering a spacious and powerful ride for tandem racing. The Chrome Moly chassis provides the strength and stability needed for dual occupancy without sacrificing speed or control. Like the single-rider model, it features a 60V motor with 6.5 KW of peak power, allowing for fast acceleration and a maximum speed of 45 MPH.

With a 410 lbs weight, the Twin-EKart maintains a balance between sturdiness and agility, ensuring a smooth and exciting ride. The hydraulic braking system guarantees safe and responsive braking, while the 60-minute battery life allows for prolonged racing fun. The kart is also equipped with a Dehaardt or RaceFacer Race Safety remote system, providing an added layer of security and control for both drivers and passengers, which can be bought separately.
